9:00 AM – 10:00 AM: Introductions and Keynote Speaker		
Speaker	Session	Descriptor
Richard Drouillard Municipality of Chatham-Kent	Numbers don't lie...until they get together	As leaders and subject matter experts for JDE, we are often called upon to provide data in new and unexpected ways. It may be for a council report, troubleshooting a discrepancy in the GL, a grant proposal or doing some analysis that our systems can't do for us 'out of the box'. Regardless of the reason, many of the problems with these requests remain the same: · The person gathering the data may lack the full picture of how the data is stored and miss an important detail. · The person requesting the data may already feel they know what the result should be and anything contrary to that must be wrong. · Even if we know we don't have the full picture, we feel pressured to 'just give us what you have'. · And many more How can we proactively avoid these problems? What can we do to help ensure our data is interpreted correctly after it leaves our hands? How can we summarize data and not introduce any bias? We will examine these questions by learning from others' mistakes, discussing best practices and showing examples of groups that 'get it'.

10:00 AM – 10:45 AM

ERP-One	Strategy for JDE upgrade	This session focuses on core strategies when upgrading to JDE 9.2 and how to lay the groundwork to keep your system up to date. A strategic approach allows your organization to maintain existing processes, the ability to stay flexible and adopt new features and functionality without a lengthy technical roll out plan. We will discuss aspects that need to be considered when deploying scheduled changes, and the tools available to help you get there effectively. The mantra of "Continuous Delivery/Adoption" incorporates Tools Upgrades, ESU's, UXOne, UDO's and all other pre-built content delivered by Oracle.
HCM	Employee Self service	What is the business case for using the JDE module vs third party or custom, and what is the functi6onality and cost difference? How does timesheet entry work? How does it integrate with the company intranet site and mobile devices?
CAM	Capital Asset Management integrations	This discussion group on ESRI and GIS integrations will explore how to create and analyze work orders through GIS?
FIN	Budgeting tools: Questica, FMW, forecasting module	Delve into third-party budgeting tools like Questica and FMW and the forecasting module in JDE.
FIN	Point of Sale/Facility Booking software and JDE integrations	How are miscellaneous sales handled across the organization? When is JDE used, when are other systems used, and how do they interface? How is facility booking done? How is the AR function handled with multiple systems in place?
TECH/USER	JDE Developers workshop	Examine aspects of JDE Development including AIS, ADF, JET, BI Publisher, RDA, Form Designer and more. Share tips, interesting customizations, and development strategies.

11:00 AM – 12:00 PM		
Stream	Session	Descriptor
ERP-One	Orchestrator and Internet of Things	The Orchestration Studio allows Business Analysts and Developers to create and schedule customized processes for the convenience of your users. This is the latest feature of the citizen developer initiative developed for EnterpriseOne. The webinar presents the features of Orchestrator, how it can be used to communicate with devices and improve the user experience. A live demo of the tools follows the lecture.
HCM	Taleo recruitment software	Learn about Taleo, its features, capabilities and benefits.
CAM	Work order discussion	Take a deep dive into the work order. This session will cover Component assets (Child assets), Work order reporting, Use of WO task and sub-task codes, Equipment costing/Preventative mtc schedules/maintenance loops, Using BOM on Parts List as a checklist, Employee time and equipment entry on WO, Parts issued to WO from inventory.
FIN	Pcard solutions and providers and JDE integrations	We'll share popular Pcard strategies and vendors/products in use today. How does Pcard use fit in with your purchasing policy? How do you manage Pcard receipts? Discuss integrations between JDE and Pcard provider.
FIN	Resourcing JDE projects using a competitive process	Learn how to navigate the challenges of resourcing JDE projects. In this session, we'll discuss strategies for resourcing JDE projects, when to engage larger consulting groups, using an RFP/RFQ process, piggybacking off other agreements, Vendor of Record lists/rosters, and assembling a team of independents.
TECH/USER	JDE Integrations workshop	This in-depth workshop will give you the opportunity to discuss any and all aspects of building JDE integrations including AIS, mobile apps, Business Services, Z tables, and integrating into any corporate apps.

12:00 PM – 1:00 PM: ERP-One Tool Demonstration		
Stream	Session	Descriptor
ERP-One	E1 Tools 9.2.2.x - Demonstration of New Features	EnterpriseOne Tools 9.2 brings a whole new suite of features and functionality for E1 releases 9.0 and 9.1 and 9.2. Changes such as Object Tracking User Defines Objects (UDO), UXOne, Orchestrations, JET, AIS and Simplified Upgrades are just a few of the new features included in this tools update. Join us to take a lab-based demonstration of new features and understand best practices for utilizing these features.
1:00 PM – 2:00 PM		
Stream	Session	Descriptor
ERP-One	Exploring the latest and greatest E1 User Interface and Usability tools (UDOs & UX One)	JD Edwards EnterpriseOne has made great strides forward recently to enhance the user experience. Business users now have many tools they can use to alert, analyze and act. This includes CafeOne, E1 Pages, OVF/OVR, Advanced Queries, Watchlists, and Grid Formatting, Forms personalization, Ent. Search. This session overviews UX1/UDO to showcase options and the ways to manage UDOs throughout your JDE ecosystem.
HCM	Benefits module and JDE integration to insurance provider	Curious about how the benefits module integrates with an insurance provider? Join us for an overview of the Benefits module in JDE and how this integrates with your benefits provider.
CAM	Asset discussion	Explore assets in this discussion on Condition assessment, Tracking condition and QRS rating, Creating 10-year forecast (JDE/Reports NOW), Structure and setup of TCAs
SCM	Supply Chain Management - various topics	Attention Supply Chain Managers! What are the pros and cons of 2-way vs 3-way match? How do you reconcile the 'received not vouchered' account? How does your year-end PO rollover process work and do you manage commitment integrity in conjunction with this? Do you use the inventory module and for what purpose? Do you use PO Autosend?

FIN	AP Automation and scanning tools	What level of AP Automation and centralization do you have in your organization? What software do you use, or are you considering, and are you happy with it? How does it integrate with JDE?
TECH/USER	JDE Purge and archive workshop	Join us for an overview of the JDE toolset for archive and purge activities, corporate archive policies and software currently on the market.

2:15 PM – 3:00 PM

ERP-One	Making your ERP a competitive advantage for your business - Extending E1 to Mobile Users, Devices and Web Portals	On January 2014, the biggest digital shift since the creation of the Internet occurred when the number of people accessing the internet via mobile devices exceeded those using computers. Today, with the myriad of new web-enabled devices, this evolution is accelerating. To remain competitive in this evolving digital business world, the ability to interact with mobile users has shifted from a competitive advantage to a basic need. The demands for ERP access by your customers, employees and vendors via these devices requires simple, flexible and secure internet access. Join us to learn how to extend EnterpriseOne for a mobile future. Understand the new JDE AIS Server, Oracle, and open source technologies that allow for internet connectivity to EnterpriseOne for mobile devices, web portals and internet-enabled devices. Learn how to properly implement a solution to extend E1 for internet accessibility. We'll share tips and tricks from our project experience.
HCM	Time and attendance	Do you use JDE modules or third party or custom? Explore the pros and cons of each and challenges. Discuss Global Leave in JDE.
FIN	Year End Processes/Monthly period closes	Are you hampered by the challenges faced with period closing? Does your organization close periods monthly, why or why not? What steps do you follow for year-end closing? Do you allow users to post back to closed years with the ## doc type? Do you use Adjustment Entries on the BU or Account Master for soft closes?

FIN	Auto Bank Reconciliation	Take the mystery out of Auto Bank Reconciliation. This session focuses on the Auto Bank Rec function in JDE. What works well, what does not, what customizations are required, and what upstream process changes you need to make to enable auto bank rec to work. How does it compare to the manual bank rec process?
TECH/USER	JDE Bolt-ons : SSO, LDAP, JDE Security, reporting tools	Join us for a broad discussion on third-party tools that connect to JDE.: Think SSO, LDAP, security products (Qsoft and All In), reporting tools (ReportsNow), Everest products, many others.
